

DATACARD® MPR SERIES GSM CARD ISSUANCE SYSTEMS

PERFECTLY ENGINEERED FOR SIM CARD SUCCESS

Solutions for every program, every budget

DatacardGroup

SIM CARD EXCELLENCE

Fast, flexible and profitable

As a SIM card issuer, you face intense operational challenges.

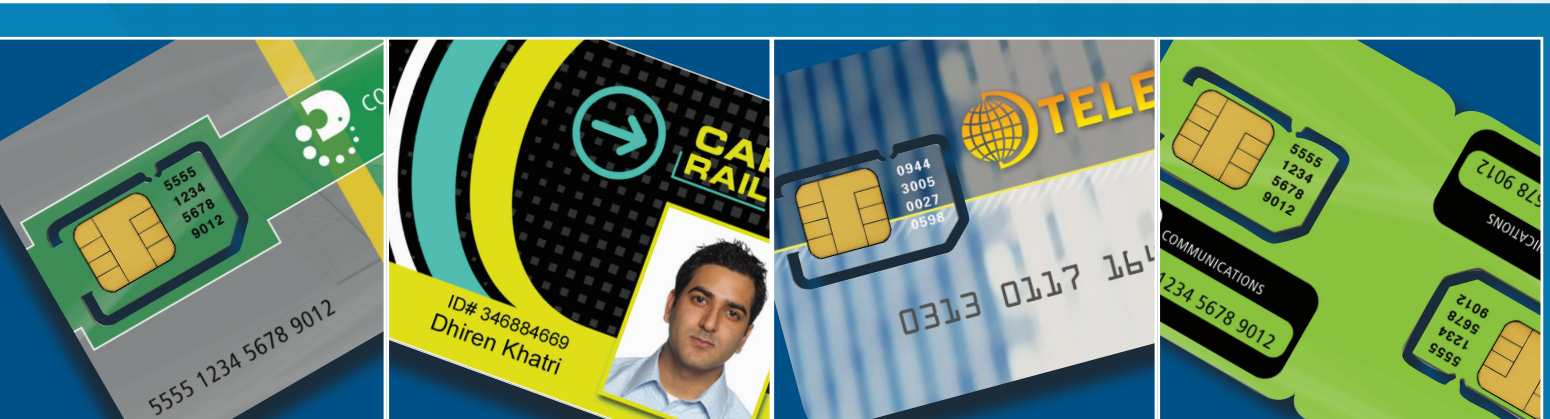

Fast growth in mobile applications and tremendous global price pressures test your ability to issue cards quickly — and with flawless precision, quality and security. You also face ever-increasing demands to minimize your cost per card. **We can help.**

The Datacard® MPR Series Systems are engineered specifically to deliver a perfect mix of speed, security and economy — so you can succeed in this ever-changing, high-pressure environment.

Systems that adapt to your program

Datacard Group offers two powerful SIM card issuance systems based on a platform that has delivered security, reliability and unmatched productivity in the most demanding card issuance environments. Both systems have the flexibility to meet your demanding requirements — and easily upgraded to align with the inevitable changes in your SIM card program.

FLEXIBLE. SECURE. SMART.

When you choose a Datacard® MPR™ Series System, you're not simply buying a device. You are investing in a platform that can be field upgraded to align with changes in your SIM card program. MPR Series Systems share common operating software, which makes it easy to port applications from one system to another.

SCALABLE SOLUTIONS

DATACARD® MPR5800™ Card Production and Personalization System

This system is ideal for programs with high volumes, multiple card types or rapidly changing requirements. The speed and quality of the system provides a powerful solution for SIM card issuance.

- Up to 10,000 cards per hour
- Multiple smart card couplers
- Multiple laser brands and technologies
- Flexible modular design
 - Double SIM card issuance
 - Smart card personalization, up to 72 single heads contact or 72 double heads contact
 - Support for contact and contactless cards
 - Laser engraving, up to six lasers
 - Vision registration, vision control
 - Supports smart card milling and embedding modules

DATACARD® MPR3800™ GSM Card Issuance System

This economically priced system is ideal for mid-volume SIM card programs that require speed, security and a consistently low cost per card. Key features include double SIM card capabilities, a variety of smart card couplers and the ability to add additional laser engraving and smart card personalization capacity in the field. The MPR3800 system is offered in four fixed configurations, so you can choose the system that best meets your needs.

- Choice of four configurations
- Up to 3,400 cards per hour
- Double SIM card issuance
- Multiple smart card couplers
- Laser engraving with field upgradable expansion

COMPLETE SMART CARD SOLUTIONS

The MPR Series systems are integrated with Datacard® Syntera® Customization Suite (CS) software, which is utilized across the Datacard® central issuance platform giving issuers one consistent software interface. The Syntera CS software provides seamless integration of custom and turnkey capabilities, which reduces time and cost of developing custom applications, as well as future maintenance.

A Heritage of Innovation and Customer Success

Datacard Group is building on a 40-year heritage of innovation and customer success. Our portfolio of solutions, backed by expert service and support, enable card and secure ID programs for financial, government and other institutions worldwide. With an unmatched commitment to customer satisfaction, Datacard remains the industry's best-selling brand of secure ID and personalization solutions.

Issue cards and credentials anywhere — with complete confidence

Secure Issuance Anywhere™ combines central and instant issuance, along with emerging mobile issuance capabilities, in a single platform. This gives organizations the flexibility to issue secure cards and credentials anytime, anywhere. Secure Issuance Anywhere™ gives issuers the freedom and flexibility to manage their card and credential programs — with exceptional physical and logical security. The Datacard Group secure issuance portfolio offers a truly integrated platform that combines Datacard® hardware, software, supplies and global support.
